

Data Analyst with 3+ years of experience across ad tech, supply chain, and e-commerce. Skilled in building ETL pipelines, automating reporting workflows, and extracting insights from large datasets. Proficient in SQL, Python, Power BI, and AWS (S3, EC2); currently upskilling in Redshift. Experienced with stakeholder reporting, forecasting, segmentation, and anomaly detection to drive customer-centric decisions.

Professional Experience

Graduate Capstone Consultant | Global Electronics Distributor

Tempe, AZ | Jan 2025 – May 2025

- Built an end-to-end ETL pipeline using Python and SQL to extract shipment tracking data from carrier portals and SAP logs; deployed workflows on AWS EC2 and stored outputs in S3.
- Trained time series forecasting models (ARIMA, Prophet) to predict carrier-level delivery delays, outperforming SAP baselines using MAE and RMSE validation.
- Integrated anomaly detection logic into Power BI dashboards and automated data ingestion via UiPath (RPA) to enable real-time tracking and exception handling.

Senior Data Analyst | KDM LLP

Remote | Aug 2023 – Jul 2024

- Designed and deployed interactive Tableau dashboards to track KPIs across sales and operations; automated data refreshes from SQL sources and delivered self-service analytics that reduced stakeholder time-to-insight and guided quarterly roadmap decisions.
- Built real-time dynamic pricing models using SQL (window functions, CTEs, stored procedures) to automate competitor-based price adjustments, increasing ROI by 30% and reducing manual overrides.
- Developed automated KPI reporting pipelines using Python (pandas, NumPy) and OpenPyXL for Excel automation; scheduled execution via Jupyter Notebooks reduced weekly reporting time by 40%.
- Integrated API-driven workflows for Razorpay (payments), real-time inventory updates, and SendGrid (customer communication), reducing order processing time by 200% and improving system sync.
- Delivered operational insights from customer and transaction data to influence roadmap decisions, support data-backed planning, and drive quarterly performance reviews across sales and ops.

Business Analyst | Media.net

Remote | Jun 2021 – Aug 2023

- Managed marketing data pipelines to support real-time performance reporting for a \$1.4M/month global lead generation portfolio.
- Designed automated workflows using Python (pandas, NumPy) and advanced SQL (window functions, CTEs) to clean, normalize, and enrich campaign performance data across platforms.
- Conducted customer segmentation and behavioral cohort analysis using k-means clustering and hierarchical methods, enabling targeted campaign optimization and geographic personalization.
- Built Tableau dashboards and SQL-powered insights platforms to track multi-touch attribution, ROI trends, and key user engagement metrics across acquisition funnels.
- Partnered with product and engineering teams to define tracking schemas, set event-based KPIs, and inform product-led growth strategies in regional and international markets.
- Delivered weekly performance insights and deep-dive campaign analytics to stakeholders, supporting iterative experimentation and A/B testing cycles.

Projects & Technical Experience

Arizona State University | Cloud-based Data Pipeline, Data Analysis & Forecasting

Tempe, AZ | Aug 2024 - May 2025

- **Yelp Review Sentiment Analysis:** Built an NLP pipeline in Python to extract and classify sentiment from unstructured Yelp review data; applied LDA and NMF topic modeling in AWS SageMaker to uncover key themes driving customer satisfaction.
- **Design of Experiments:** Applied regression and ANOVA to simulate and optimize marketing and production setups; generated controlled experiment results to guide business decisions.

Education

Master of Science in Business Analytics | Arizona State University (W. P. Carey School of Business)

Graduation May 2025

BBA in Marketing | NMIMS Anil Surendra Modi School of Commerce

Graduation May 2021

Key Skills

- **Cloud & Data Engineering:** AWS EC2, AWS S3, IAM, Python Scripting, ETL Pipelines, Data Warehousing
- **Data Visualization & Reporting:** Tableau, Power BI, QuickSight Looker Studio, Performance Reporting.
- **Data Tools:** SQL (MySQL, PostgreSQL), pandas, NumPy, OpenPyXL, Jupyter, Agile & Waterfall, UAT, BRD, User Stories,
- **Big Data & Automation:** Batch Processing, Anomaly Detection, Scheduled Workflows, RPA (UiPath), Lucidchart, Figma, JIRA

Certifications & Training

- AWS Data Analytics Foundations, Agile Methodologies, Amazon Redshift Fundamentals (In Progress)
- Lean Six Sigma Green Belt, Power BI & SQL for Data Analysts, Machine Learning for Business Analytics (Completed)
